

## **CASC Registration Figures**

The most recent CASC figures available are from October 2011 and show that the total number of CASC registrations has reached over 6,000. These clubs have saved over £100 million. The links below show registrations in greater detail.

Should you use the figures please could you attribute them to Tim Baldwin for any data from October 2011 onwards or to Deloitte for any data prior to this. Compiling the reports represents a significant amount of effort on their behalf so we would be grateful if you could recognise this accordingly.
