

Salcombe Rugby Club

Salcombe Rugby Football Club were one of the first clubs to realise the benefits of CASC and registered in 2002. A thriving community club in Devon, Salcombe has been able to build on its success.

Utilising Gift Aid and the mandatory rate relief, Salcombe have been able to invest in the club's facilities. In addition to purchasing new playing kits with the saved money, Salcombe have refurbished their bar area and purchased a new scrummaging machine, both of which would have been that bit more difficult without CASC registration.

Salcombe's junior ranks are swelling. The refurbishment in the club's facilities has actually increased its revenue, reinforcing its place at the centre of the local community.
